

Optical Coatings Market: Technologies, Product Segments, and Opportunities Inculcating High Growth till 2019

"The Report Optical Coatings Market (Anti-Reflective Coatings, Filter coatings, Transparent Electrodes, Reflective Coatings and Others) For Electronics, Defense/security, Infrastructure, Solar and Others Applications: Global Industry Analysis, Size, Share, Growth, Trends And Forecast, 2013 - 2019 provides information on pricing, market analysis, shares, forecast, and company profiles for key industry participants. - MarketResearchReports.biz"

The report analyses the optical coatings market. For an insightful understanding, analysis and forecast have been provided for the time period ranging from 2013 to 2019. The forecasts are on the basis of volume (kilo tons) and revenue (USD million) for both global and regional levels. In-depth analysis of the various factors driving and restraining growth of the optical coatings industry has been included. A thorough analysis of the prevailing and expected growth opportunities in the industry has been included in decision-making.

The value chain analysis comprises of a detailed evaluation of the roles of various entities involved in the optical coatings industry from raw material suppliers to the end users. In addition, Porter's five forces model has been used to determine the degree of competition in the industry during the forecast period. Furthermore, market attractiveness analysis has been done to analyze which application segments are expected to be lucrative during the forecast period on the basis of their market size and growth rate.

The optical coatings market has been segmented on the basis of product and application. The segments have been analyzed and forecast for a time period ranging from 2013 to 2019. The forecast is on the basis of volume (kilo tons) and revenue (USD million) for both regional and global level based on current and expected trends of the industry. Regionally, the market has been segmented into North America, Europe, Asia Pacific and Rest of the World (RoW), and the demand has been analyzed and forecast based on current trends for a period of six years, ranging from 2013 to 2019.

The report also covers profiles of the leading companies in the optical coating industry. A detailed analysis of the market shares of the major players has been included. Company profiles of companies such as PPG industries, 3M Precision Optics, OphirOptronics Ltd., and certain other companies has been included. The company profile encompasses various attributes of the companies including company overview, financial overview, SWOT analysis, business strategies and recent developments. The market has been segmented as below:

Optical Coatings Market: Product Segment Analysis

- Anti-Reflective Coatings
- Filter coatings
- Transparent Electrodes
- Reflective Coatings
- Others (Anti-glare coatings, polarized coatings, etc.)

Optical Coatings Market: Application Analysis

- Electronics
- Defense/security
- Infrastructure
- Solar
- Others (Medical, telecom, transportation, etc.)

The report provides a cross-sectional analysis of the above product and application segments with respect to the following regions:

- North America
- Europe
- Asia Pacific
- Rest of the World
